

Case Study: Kitchen Remodel
Minneapolis colorful cabinets

This project took a cramped, oddly laid out kitchen and opened it up to the dining room to create a light, bright kitchen with pops of color. This case study will walk you through the plan development and finishes selected for this client. We hope that you find this case study helpful and inspiring as you begin the process of planning your own remodel!

Needs and wants discussed with the client:

1. Open-concept kitchen and dining area
2. High-end appliances and finishes
3. Mud area with organization
4. Bench seat in the existing bay window

General items included with each Sicora project:

- Permits, construction plans, inspections, dumpster, lead testing, and necessary site prep all included
- Portable on-site toilet provided
- Design assistance for finish and material selections and project management included
- Structural engineering was included with this project
- Online client web portal set up specifically for the management of your project
- Sicora will provide a full warranty for your project (12-month cosmetic warranty, 2-year mechanical warranty, and a 10-year structural warranty)
- Sicora owns its own custom cabinet shop, which allows us to create custom, unique solutions for your space
- Appliances are paid for and supplied by the owner. The cost of appliances is NOT included in any projects described. Sicora will provide the installation of your appliances

'Before' floor plan

The kitchen had an unusual layout with a sink on a triangle-shaped set of counters

Created a mud area with storage and organization

Added a powder room
